MITSUI-SOKO HOLDINGS Co., Ltd.

MITSUI-SOKO HOLDINGS Selected as Noteworthy DX Companies 2025

MITSUI-SOKO HOLDINGS Co., Ltd. (Head Office: Chuo-ku, Tokyo; President and CEO: Hirobumi Koga) has been selected as Noteworthy DX Companies 2025 in the Digital Transformation Stocks (DX Stocks) program, a prestigious selection made by the Ministry of Economy, Trade and Industry (METI), the Tokyo Stock Exchange (TSE), and the Information-Technology Promotion Agency, Japan (IPA) (hereinafter referred to as “METI and the organizations”). A grand ceremony celebrating the winners of the DX Stocks 2025 category took place on May 30.

About Noteworthy DX Companies 2025

From among TSE-listed companies, METI and the organizations select outstanding companies that have internally established systems for promoting DX, an approach that contributes to improving corporate value, and that have achieved outstanding utilization of digital technologies as DX Stocks. From among the companies not chosen for the DX Stocks 2025 category, METI and the organizations select those that have made significant efforts, especially in contributing to corporate value, as winners of the Noteworthy DX Companies 2025¹.

¹ METI Press Release:

[DX Stocks 2025, Noteworthy DX Companies 2025 and DX Platinum Companies 2025-2027 Selected](#)

Since the establishment of the MITSUI-SOKO Group DX Strategy in 2021, the MITSUI-SOKO Group (hereinafter referred to as the “Group” or “we”) has been dedicated to generating social value through digitalization and enhanced visibility in supply chain management (SCM). This effort extends beyond the Group itself, fostering collaboration with external companies across various industries. Our recognition as Noteworthy DX Companies 2025 underscores the social impact, innovative spirit, and promising future of our initiatives.

Press Release

[Key DX Initiatives Promoted by the Group]

1. IoT-Enabled One-Stop Logistics Service for the Healthcare Sector

We offer a “one-stop logistics service” to handle a wide range of temperature-sensitive goods, from ambient temperature to refrigerated, ultra-low temperature, and cryogenic conditions (below -150°C / -238°F). This service extends from Japan to international destinations, leveraging IoT-enabled systems within the supply chain for pharmaceutical products, particularly in the field of regenerative medicine. This service ensures the safe and reliable distribution of all raw materials, intermediates, and products under the required temperature conditions. Additionally, we provide pharmaceutical logistics solutions tailored to diverse needs, including strategic location proposals for business continuity planning (BCP) and manufacturing services for frozen products.

2. SustainaLink Utilizes Logistics Data Collected by LVL

We have developed Logistics Value Link (LVL), an SCM platform service that digitally stores, manages, and utilizes information regarding the movement and location of goods, enhancing operational efficiency through the digitization of information transmission. Utilizing SustainaLink², we offer comprehensive end-to-end services ranging from calculating logistics CO2 emissions for individual products based on data collected by LVL to proposing effective emission reduction strategies, enabling us to deliver multifaceted solutions to the challenges faced by our customers’ supply chains.
